

# LUC-OS Agent

The diagram illustrates the LUC-OS Agent architecture. At the top is a large blue block labeled 'LUC-OS Agent'. Below it, several components are arranged in a row: Neutron (orange), Nova (green), Glance (light blue), Swift (light blue), KeyStone (red), and Horizon (red). These components are positioned above a grey block labeled 'Physical Infrastructure'. The components are connected to the LUC-OS Agent block by a series of white lines that step down from the agent to each component, indicating a hierarchical or control relationship.

**Neutron**

**Nova**

**Glance**

**KeyStone**

**Swift**

**Horizon**

**Physical Infrastructure**
